Class 5 Data Visualization with ggplot2

Nicole (PID:A16631132)

Using GGPLOT

The ggplot2 package needs to be installed as it does not come with R "out of the box"
We use the `install.packages()` function to do this.

```
head(cars)
```

```
  speed dist
1     4    2
2     4   10
3     7    4
4     7   22
5     8   16
6     9   10
```

To use ggplot I need to load it up before I can call any of the functions in the package. I do this with the `library()` function.

```
library(ggplot2)
ggplot()
```

1

All ggplot figures have at least 3 things: - data (the stuff we want to plot) - aesthetic mapping (aes vales) - geoms

```
ggplot(cars)+
  aes (x=speed, y=dist) +
  geom_point() +
labs(title="Speed and Stopping Distances of Cars",
      x="Speed (MPH)",
      y="Stopping Distance (ft)",
      subtitle = "Your informative subtitle text here",
      caption="Dataset: 'cars'") +
  geom_smooth(method="lm", se=FALSE) +
  theme_bw()
```

`geom_smooth()` using formula = 'y ~ x'
Speed and Stopping Distances of Cars
Your informative subtitle text here
Dataset: 'cars'

ggplot is not the only graphing system in R there are lots of others. There is even "base R" graphics.

```
plot(cars)
```

```
url <- "https://bioboot.github.io/bimm143_S20/class-material/up_down_expression.txt"
genes <- read.delim(url)
head(genes)
```

```
       Gene Condition1 Condition2       State
1      A4GNT -3.6808610 -3.4401355 unchanging
2       AAAS  4.5479580  4.3864126 unchanging
3      AASDH  3.7190695  3.4787276 unchanging
4       AATF  5.0784720  5.0151916 unchanging
5       AATK  0.4711421  0.5598642 unchanging
6 AB015752.4 -3.6808610 -3.5921390 unchanging
```

```
p <- ggplot(genes) +
    aes(x=Condition1, y=Condition2, col=State) +
    geom_point()
p + scale_colour_manual( values=c("blue","gray","red") )+
    labs(title="Gene Expresion Changes Upon Drug Treatment",
         x="Control (no drug) ",
         y="Drug Treatment")
```

Gene Expresion Changes Upon Drug Treatment

```r
library(gapminder)
```
```r
library(dplyr)
```
```
Attaching package: 'dplyr'

The following objects are masked from 'package:stats':

    filter, lag

The following objects are masked from 'package:base':

    intersect, setdiff, setequal, union
```
```r
